The only self-adhesive carpet protector fully certified and approved by the LPCB

With construction sites needing to comply to the LPS 1207 standard, Protec have developed **Carpet Shield FR**, which is now the only self-adhesive carpet protector currently available which meets this requirement and is fully certified and approved by the LPCB.

Easily applied with the push of a foot...

...no taping, no bending

Ideal for carpeted walkways - no jointing required

Not only flame retardant and LPCB approved - but safer too

Unlike non-adhesive protection materials, Protec Carpet Shield FR adheres directly to the carpet and is therefore safer in use. Added to this, the material has a non-slip embossed surface which gives added grip and greater slip resistance.

Easy to install and remove

Carpet Shield FR is reverse coated with a low tack adhesive on the outside and is uniquely 'loose wound' with a release agent on the face, so it literally rolls out along the floor in seconds with the push of a foot without even bending down.

It's easy to remove too, peeling off quite simply without leaving any adhesive residue on the carpet.

Available in two widths to suit a variety of applications, it's ideal for carpeted walkways, corridors and stairways and is particularly effective for large floor areas as there is no need to tape or joint.

Perfect for corridors...

...and easily applied to staircases

Simply and quickly removed with no adhesive residue

Embossed texture for added grip

**CUSTOM
PRINTING
AVAILABLE**

Stocked in the following sizes and grades:

Width	Length	Adhesive
600mm	100m	Low tack
800mm	100m	Low tack

FEATURES & *BENEFITS*

Flame Retardant and approved to the LPS 1207 standard

Conforms to the requirements of The Joint Code of Practice

Produced by ISO 9001 manufacturer

Guarantees that the product is always made to the same high standard

Sticks directly to the carpet

Avoids trip hazards

Embossed surface

Anti-slip/anti-trip material which contains dirt and spillage

Reverse wound

Wound the correct way for simple application

Waterproof

Resists spillages of all magnitude

Lightweight manageable rolls

Easy to handle and fix

Low tack

No residue left on surface beneath

Quick and easy to install

Cost-effective protection

Yet again we're out in front of the rest

As the construction industry's leading supplier of temporary protection materials, our innovation is anything but temporary.

It's the motivation to constantly improve an already high performing range of products that's put us at the forefront of the industry and with **Carpet Shield FR**, yet again we're ahead of the rest.

The screenshot shows the Protec website interface. At the top, the Protec logo is on the left, and the tagline "The Standard For Temporary Protection" is on the right. Below the logo is a navigation menu with links for Home, Products, Support, Why Choose Protec?, and Contact Us. A secondary menu includes Find Products, How To Order, Flame Retardant Certification, and Custom Printing. The main content area features the product name "Protec Carpetshield FR" with a trademark symbol, and its size "1200mm x 100m". A "Flame Retardancy" note states: "This product is flame retardant but is not certified as such." Three photographs illustrate the product's use: rolls of material, a worker applying it to a carpet, and a worker walking on the protected area. A "View larger photos" link is provided. Below the photos, the heading "Sticks directly to the carpet" is followed by a description: "Protec Carpetshield FR is a low tack LPCB Approved flame retardant film, which is embossed to provide a non-slip surface and adheres directly to the carpet without the need for taping." Further text describes its ideal use for walkways, corridors, and stairways, and notes its reverse-wound design for ease of application. A final note mentions its availability in lightweight, manageable rolls. On the right side of the page, there is a "Talk to an expert" section with a "Ready to order? Or need some advice?" prompt, a phone number "Call us FREE on 0800 834 704 (Mon - Fri, 7:30am - 5:30pm)", and an "Ask us a question by email" section with a text input field.
